

HSBC ISLAMIC FUNDS

HSBC ISLAMIC GLOBAL EQUITY INDEX FUND

Monthly report 30 November 2022 | Share class AC

Investment objective

The Fund aims to track as closely as possible the performance of the Dow Jones Islamic Market Titans 100 Index (the Islamic Index).

Investment strategy

The Index is comprised of the shares of companies in emerging and developed markets that are based anywhere in the world. The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index. The shares are selected by filtering the Index universe through screens for business activities and financial ratios to remove stocks that are not Shariah compliant. The Fund will only invest in shares of companies that meet Shariah compliance principles as interpreted or approved by the Shariah Committee. The Shariah Committee monitors the Fund throughout the year and issues an annual Shariah certificate on the Fund's compliance with Shariah principles. This certificate is included in the annual report of the Fund as confirmation of the Shariah compliance for that year. The Fund will not invest in derivatives.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").

Share Class Details

Key metrics

NAV per Share	USD 18.87
Performance 1 month	7.19%
Volatility 3 years	19.81%

Fund facts

UCITS V compliant	Yes
Dividend treatment	Accumulating
Dealing frequency	Daily
Valuation Time	23:00 Luxembourg
Share Class Base Currency	USD

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.
